Telecon Bo With MDEC

Bo advises me that Col Surgeon of HFTB has referred the MDEC proposal to the Combined Armed Forces Center at Fort Leveningworth, Kan for evaluation since he telt that it has application to all the armed services. His letter of transmittal was good and favorable. At that center the proposal is being conceptually evaluated and more than likely it will be referred to Sim Caviness's office for that approval. Concurrently the proposal has been sent to the Aberdeen Proving Ground for technical evaluation.

They are also with Lt Col Madsen and his assistant Ma; Bob Conti who are statt to Brig hen John Brown, Director of Programs and Plans Through these contacts they are trying to get an appointment with Dr Lasser

who is Chief of Army Research.

Bo figures that it will take 8-12 menths to obtain the necessary approvals and perhaps as much as 24 months before the Army would fund the program if it is approved all along the way. He indicated that he will give us a gragies seport about every two weeks.
